Executive Summary

The Match is a first-of-its-kind mobile platform that unifies every dimension of a golfer's experience — before the round, during the round, and after it. No existing app on the market combines live Eagle Eye satellite imagery, AI-powered shot analysis, a competitive social layer, live PGA Tour scores with player headshots and country flags, smart tee time coordination, The Match Tab Augusta-style live leaderboard, and professional AI-generated player cards — all under one roof. The Match is not an incremental improvement to golf apps. It is the category-defining platform that 41 million American golfers have been waiting for.

The Problem

- **Fragmented experience:** Golfers juggle 4–6 separate apps for GPS yardage, scoring, social updates, tee time booking, and tour news.
- **No social infrastructure:** Golf has a deeply social culture, yet no platform lets players see where friends are playing, track head-to-head history, or coordinate outings at scale.
- **Coordination chaos:** Group rounds rely on overloaded text chains. Last-minute cancellations have no smart fill-in solution.
- **Generic distance data:** Existing GPS apps give raw yardage. None incorporate real-time slope, elevation, and live weather into AI-generated shot recommendations.
- **No pro experience for amateurs:** Weekend golfers want the same broadcast-style presentation PGA Tour pros get — complete with their own photo on a live scoreboard.

The Solution

The Match solves every one of these problems with a cohesive, beautifully designed mobile platform built ground-up for golfers. Eight deeply integrated features — the majority already live in production — create a flywheel of engagement that grows stronger with every friend added to the network.

Product Deep Dive

■ Eagle Eye — GPS & Satellite Imagery	Real-time GPS yardage to pins, hazards, and layup zones. Eagle Eye overlays a live satellite image of the hole currently being played — giving golfers a true aerial view of dogleg layouts, tree lines, and hidden landing zones. Players see exactly what PGA Tour caddies see in a course book. Live now.
■ AI Shot Advisor	One button activates the camera. The player points at the flag; The Match's AI engine synthesizes live GPS-based slope data, current wind speed and direction from real-time weather APIs at the player's exact coordinates, and elevation differential — delivering a precise, personalized yardage recommendation. The first consumer golf tool to combine all three variables dynamically in the field.
■ Social Graph & H2H Records	The Match introduces the first true social graph for golf. Players build a friends network and can view any friend's course history, recent rounds, and performance trends. A running head-to-head record against each friend is tracked and surfaced — making every round a chapter in an ongoing rivalry.
■ Availability Calendar & Smart Tee Time Booking	Users post their available play days to a shared calendar visible across their friend network. Friends see who wants to play on any given day, tap a name, and send a play request — all within the app. The Match integrates with GolfNow to complete tee time booking without ever leaving the platform. Confirmed tee times auto-populate on the user's profile dashboard.
■ Fill My Spot — Last-Minute Game Changer	When a player drops out the night before, the remaining group hits "Need 1" or "Need 2." Instant push notifications go to every friend on the network. The first to respond claims the spot. This solves one of golf's most persistent pain points and drives daily active usage of the notification layer.
■ Live PGA Tour Leaderboard	An in-app live leaderboard pulls real-time PGA Tour scores during active tournaments — complete with official player headshots and country flags powered by the ESPN API. While playing a Saturday morning round, players glance between holes and follow the tour action. A retention driver that keeps users inside The Match ecosystem even during passive moments.
■ The Match Tab — Augusta-Style Live Scoreboard	The crown jewel of the platform. When friends play together, The Match Tab generates a live Augusta Masters–style leaderboard. Each player's AI-generated profile photo populates alongside their name and live score — giving every amateur round the broadcast presentation of a major championship. One player per group enters scores; the full leaderboard updates in real time across all devices. Supports groups of any size.

■ AI Pro Profile Photo Generator

Users take a selfie in golf attire; The Match's AI engine removes the background and composites them into a professional PGA Tour–style portrait. Users choose from 17 country flag backgrounds rendered as diagonal geometric patterns — replicating the ESPN player card aesthetic. These photos auto-populate in the Match Tab scoreboard, making every golfer look like a tour pro.

Market Opportunity

Segment	Size	Notes
Total Addressable Market (Global Golf Industry)	\$84B	Equipment, apparel, tech, media, venues
Serviceable Addressable Market (Golf Apps & Tech)	\$3.2B	GPS, swing analysis, booking, media
US Active Golfers	41M+	18% YoY growth post-2020 golf boom
18–45 Digital-Native Golfers	~18M	Primary acquisition target
GolfNow / Tee Time Booking Market	\$1.1B	Integration & referral opportunity

Why Now

- Golf participation surged 18% post-COVID and has held — a permanent demographic shift with younger players entering the sport.
- The digital-native golfer expects the same app sophistication from golf tools that they get from fitness, food delivery, and social media.
- AI on-device capabilities (camera ML, weather APIs, GPS precision) have reached the maturity needed to power The Match's features at scale — and The Match has already deployed them.
- No incumbent has moved to consolidate the golf app space. The window for a platform play is open right now, and The Match is already live.

Competitive Landscape

Existing apps address single use cases in isolation: 18Birdies and Golfshot offer GPS. The Grint and GHIN handle handicap tracking. GolfNow handles booking. No platform offers a social graph, head-to-head records, group coordination, live scoring with AI player photos on a live scoreboard, AI shot advice, and PGA Tour content in a unified experience. The Match is not competing with these apps — it is replacing all of them.

Feature Comparison

Feature	The Match	18Birdies	Golfshot	The Grint	Golf Now
Eagle Eye GPS & Satellite	✓	Partial	Partial	✗	✗
AI Shot Advisor	✓	✗	✗	✗	✗
Social Graph & H2H Records	✓	✗	✗	Partial	✗

Business Model

Freemium Subscription: Core features free. The Match Pro unlocks advanced Eagle Eye overlays, full AI Shot Advisor history, complete H2H analytics, and expanded Match Tab capabilities. Target: \$7.99/month or \$59.99/year.

GolfNow Referral Revenue: Each tee time booking completed through The Match generates a referral fee from GolfNow's affiliate program. High-frequency, zero-friction revenue already flowing from live integrations.

In-App Advertising: Non-intrusive placements targeting golf equipment, apparel, and lifestyle brands — served contextually during PGA Tour leaderboard views, post-round recaps, and Match Tab score summaries.

Premium Match Tab & Outing Packages: Golf clubs, courses, and corporate event organizers pay for white-label Match Tab packages — branded Augusta-style live scoreboards with player AI photos for tournaments, member days, and charity events.

AI Photo Credits: Freemium allocation of AI profile photo generations; additional credits purchasable. Low cost to serve, high perceived value — live today with 17-country flag selection.

Unit Economics Snapshot

Metric	Year 1	Year 2	Year 3
Target Registered Users	50,000	250,000	1,000,000
Pro Conversion Rate	8%	12%	15%
Annual Subscription Revenue	\$240K	\$1.8M	\$9M
Tee Time Referral Revenue	\$80K	\$600K	\$3M
Blended ARPU	\$6.40	\$9.60	\$12.00
Est. Total Revenue	\$360K	\$2.5M	\$13M+

** Projections based on comparable golf app growth curves and a 2% SAM penetration trajectory. Not a guarantee of future performance.*

Growth & Acquisition Strategy

- Network-effect driven viral growth: every friend invitation exposes The Match to a new user at near-zero CAC.
- Golf course partnerships for on-property promotion and QR code installs at the 1st tee.
- Content marketing via golf influencer and YouTube creator channels — where the golf audience is most engaged.
- Golf league and club outreach: a single 100-person club with active rounds can generate thousands of Match Tab sessions per season.
- PGA Tour content integration drives SEO and organic discoverability during every tournament weekend — already live.
- AI-generated player cards provide inherent social virality: golfers share their pro-style photos to Instagram and X, driving organic installs.
- Premium Match Tab events at corporate and charity golf days create B2B revenue and viral exposure simultaneously.

Use of Funds

Allocation	% of Raise	Purpose
Engineering & Product	40%	Native iOS/Android builds, AI model optimization, Eagle Eye satellite data
Marketing & User Acquisition	30%	Influencer campaigns, course partnerships, App Store ASO
Operations & Infrastructure	15%	Cloud infrastructure, GPS/weather API costs, GolfNow integration scaling
Business Development	10%	Course & league partnership development, white-label Match Tab sales
Legal & Compliance	5%	IP protection, data privacy, corporate structure

Milestones & Roadmap

Q3 2025	PWA launched on Vercel. Auth, Home Dashboard, Eagle Eye AI Shot Advisor, and GolfNow tee time integration live.
Q4 2025	Live PGA Tour Leaderboard with ESPN-powered player headshots & country flags. AI Pro Profile Photo Generator launched with 17-country flag diagonal backgrounds. Active Round GPS hole-by-hole scoring live.
Q1 2026	Full social graph, availability calendar, H2H records, tee time requests, Stats page with handicap index, and The Match Tab Augusta-style live leaderboard with AI player photos — all shipped. Complete platform live at the-match-roan.vercel.app.
Q2 2026	Home rebuilt as Profile + Social Command Center. Full DB migration for social tables, friends, seasons, and outing history complete. Premium visual overhaul shipped across all screens.
Now	Native iOS & Android app store builds. Because The Match is already a fully functional PWA, wrapping it for the App Store and Google Play is straightforward — the entire product is built; this is packaging, not development. Series A preparation underway.

The Match is built on a simple truth: golfers are deeply social, deeply competitive, and deeply underserved by technology. We are not building an app feature — we are building the operating system of golf culture. The golfer who installs The Match will never need another golf app again.
